URLAnnotator

Fast readers,
slow writers

- reading takes 15 sec, very often (10 per minute)
- writting takes 30 min, once an hour

- reading takes 15 sec, very often (10 per minute)
- writting takes 30 min, once an hour

Why bother?

- reading takes 15 sec, very often (10 per minute)
- writting takes 30 min, once an hour

Why bother?

It happens - **URLAnnotator** aka **buildaclassifier**. Possibly also Troia.

Next time: slow readers ...
